Name…… Grade ……..

Design the combo menu for the pizza restaurant by selecting a pizza with an item from the side order. There are 2 types of pizzas and 3 types of side orders.

Combo Menu	Pizza		Side order		
	 Mushroom pizza	 Seafood pizza	 Drink	 Chicken	 Salad
1	✓		✓		
2					
3					
4					
5					
6					

How many different combo menus can you design? ☐

How did you derive the answer?

Total combinations ☐ + ☐ = ☐

Name…… Grade ……..

Activity : Guess & Check

Concepts: Multiplication and Division,
Equal distribution

Heuristics: Guess and check,

Tools : 8 ducks, 5 horses, 24 plastic sticks.

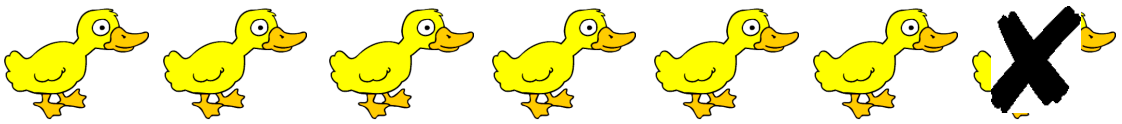

In a farm, there are a total of 7 heads with 24 legs.

How many ducks are there?

1. Count and take out 24 legs.
2. Assume all the 7 heads are ducks. Draw all the legs of the 7 ducks.

3. How many extra legs are there? _____ legs
4. Cross out a duck to replace with a horse. Draw the 4 legs for the horse until there is no extra legs left. How many horses are there?

Legs

Legs

Ans: _____ ducks _____ horses

Name…… Grade ……..

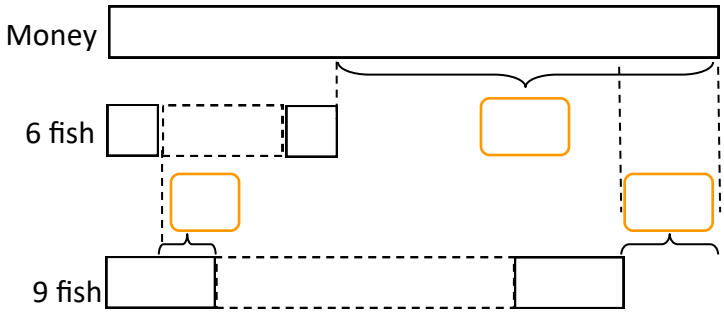

Amy has some money at first. She wants to buy some fish. If she buys 6 fish, she will have $17 left. If she buys 9 fish. she will have $5 left.

a) What is the cost of a fish?

b) How much money does she have?

Cost of a fish	No. of fish bought		No. of fish bought		√, X
	6	$17 left	9	$5 left	

Alternative solution:

Difference in no. of fish bought =

Difference in money left =

Cost of a fish =

Amount of money =

Ans: _____
